## Declaration for Mismatch in Data Related to the Number of Beneficiaries of Scholarships in the Last Five Years

This is to apprise the National Assessment and Accreditation Council (NAAC) that the data related to the number of beneficiaries of scholarships over the preceding five years were mistakenly calculated, and upon meticulous scrutiny, it has been discerned that the figures presented do not align with the actual count of recipients. The data suggested by the DVV from the supported documents is accurate and may please be considered for calculation to ensure the accuracy of the accreditation assessment process.
