Course Objective:

The extreme crisis of environmental pollution is one of the most important international problems in the context of the present time. Human societies driven by science and technology are driven in their way of life by excessive needs and greed. The crisis of the natural environment due to excessive use of underground natural resources, excessive deforestation due to urbanization and excessive population growth, etc. Continues to affect the present situation. It is not possible to get rid of this man-made natural crisis by using only science and technology, in the case the practice of moral discipline is also essential. The moral teaching of ancient Indian philosophy can be very relevant in solving this environmental crisis. In this course an attempt is made to explain the very brief identity of environmentalism based on Veda- Upanishad, Ramayana, Mahabharata, Srimantragavadgita, Jainism and Buddhism,

Course Outcome: The course will be beneficial for the students because,

1. Students will gain knowledge about ethics and Ecology.
2. Students will be aware of the Ecology and they will protect the Ecology.
3. Students will learn about the Environmental awareness mentioned in the Vedas Upanishads, Ramayana, Mahabharata, Gita, Puranas and Jain and
