ABOUT THE WEBINAR

Philosophy is not a theory but a vision of life. It is not merely 'love of wisdom' but signifies a real 'possession' of it. The philosophers are therefore not professors, academicians or doctrinaires, or even 'spectators', but true participants of life in its real meaning and relationship. Philosophy is a well-coordinated and systematized attempt at evaluating life and the universe as a whole. It is an impartial approach to all problems and aspects of life and existence. It is an essential set of skills for living well. To live life to the full requires balance, empathy, reason and the development of a purposeful sense of what life is for. Philosophy is a conversion, a transformation of one's way of being and living, and a quest for wisdom. That is why, philosophy and life is the quest of our Webinar.
